

Introduction

An alumni association is an association of graduates or, more broadly, of former students (alumni). In the United Kingdom and the United States, alumni of universities, colleges, schools (especially independent schools), fraternities, and sororities often form groups with alumni from the same organization. These associations often organise social events, publish newsletters or magazines, and raise funds for the organisation etc .

Colleges and schools conduct many events and many of them are applicable for alumni students too . Manually contacting alumni students is a difficult task . We can make this task easy using an extra plugin to contact alumni students via existing archived students database

Product Overview

Fedena Alumni is a module that allows the school/college to communicate alumni students for inviting to events and sending news etc . Privileged users can view the list of archived/alumni students . Alumni student list filterable based on course,batch and passout year.

Alumni students can be invited using existing events or new event created for alumni. Event coordinators and organisers can also be assigned to an event.

Alumni can interact in event specific page.

Purpose

To simplify the event invitation procedure for alumni students.

Scope

This Plugin is for informing events and managing alumni students .This plugin is supposed to satisfy both the alumni who wish to gather. By using this product college management can invite the alumini students for the upcoming events.and provide a platform for discuss about that event. this application can use to inform the students about an job opportunities also
